

Top Tips for Engineering Revision

1. Make the most of lessons

Teachers have planned the remaining weeks to complete the GCSE course. Time is of the optimum and work done in lessons is very important. If you miss any lessons ask what you can do to catch up.

2. Complete all homework on satchel:one

If you have been asked to do homework's, please do them.

3. Refine coursework

The coursework (NEA) for the course is ongoing. The deadline will be with us before you know it. The work should be constantly refined to make sure it is of as high a quality as is possible.

4. Visit the Engineering GCSE website

A website has been built for you that includes flash cards for all the theory content you need to know, this can be revised by you independently, it also has a selection of past papers and mark schemes as well as the specification for the course.

The address for this is www.msheardt.weebly.com

5. Complete past papers using the mark scheme.

Completing past papers and comparing the to the mark scheme is a valuable exercise, past papers and mark schemes can be found on the AQA website and on the Engineering website.

6. Attend Engineering intervention

Friday week 2 in the business suite.

7. Buy the Engineering GCSE revision book

My Revision Notes: AQA GCSE (9-1) Engineering.
